

Led Traffic Light "Count Down"

	Units number: two		Type of Batteries: batteries network		On/off switch: internal		Dimensions (H / L / W): box 54 x 50x 80 cm
	Luminous intensity regulation: variable intensity depending on ambient light		Power supply: 12 V _{dc}		Consumption: avarage 1,1A max 1,6A		Weight: 54 Kg
	Light source: led lantern (yellow 2 ciphers)		Connection type: quartz synchronization with cables		Maximum distance: depending on travel time		Temperature: -15 °C - +85 °C

/ Product Description /

The countdown lens is an advanced counting system for traffic light of fixed times.

The system is powered by three traffic light lamps and does not require additional cabling control. In facts the counting time and the configuration are automatically made during the first traffic light cycle.

Thanks to the high brightness and to the LED color, depending on the traffic light phase, the display results readable even from great distances avoiding the risks of a wrong reading of the drivers.

The three digit version guarantees a correct display from 1 to 188 seconds, besides if you need more time, it is possible to visualize the time left in minutes, if the time is above 3 minutes, and in seconds if the time is below 3 minutes.

The countdown is available in the 230V_{ac} version and 12V_{dc}.

/ Packaging /

	Dimension: 54x50x80 cm weight: 27kg for each traffic light trailer
	Dimension: 80x100x175 cm weight: 172 kg
