

h 5 cm Rubber Speed Moderator

(Dimensions 50x50x5 cm)

	Dimensions (H / L / W): speed moderator: 5 x 50 x 50 cm insert: 15,5 x 11,8 cm terminal: 5 x 50 x 27 cm		Construction materials: High elasticity vulcanized rubber product
	Weight: speed moderator: 12 kg terminal: 3,8 kg		External surface treatments: application of 4 elastoplastic yellow reflective inserts

Code: 109605412 - 5 cm speed moderator
Code: 110415000 - 5 cm terminal

/ Product Description /

Speed moderator is made of convex profiled vulcanized rubber, with high elasticity, high resistance to the hurts and crushes of the vehicles.

To obtain a better visibility during the night, the speed moderators are integrated with elastoplastic yellow color tape inserts.

In the upper side the speed moderator and the terminal have anti-slip parts, besides their lower side shape facilitates the water flow. Application to the ground is made through n.6 expansion fixing screws.

The terminal is made of convex profiled vulcanized rubber, with high elasticity, high resistance to the hurts and crushes of the vehicles.

Thanks to its slope the terminal (lateral section) must be applied on the sides of the speed moderator, respecting the joints to eliminate the difference in level due to the laying of the speed moderators on the ground that is made by n.4 expansion screws.

/ Working Description /

Rubber speed moderators can be installed on the streets with a speed limit of 40 km/h or less, on residential streets, in public and private parks, in residences, etc.

They can be installed in sequence and must be signaled. Rubber speed moderators must form an alternating yellow and black stripings parallel to the direction of the street, being of equal width as far as signs and intervals are concerned, and be visible both day and night.

/ Miscellaneous /

The speed moderator must be hardly installed on the ground using appropriate screws, to avoid shifts or detachments, It must be also easily removable.

/ Packaging /

 (pallet - 80 pcs)	Dimension speed moderator: 80x120 cm weight: 975 kg
 (pallet - 100 pcs)	Dimension male terminal: 80x120 cm weight: 380 kg
